

39. A method of surveillance, comprising the steps of:

monitoring a zone of surveillance to detect an existence of an undesirable presence;

generating an infrared coded signal in response to said undesirable presence;

performing a specific function in response to said infrared coded signal; and

generating an image of said zone of surveillance, wherein said specific function is to control a recording device in order to record said image.

40. The method of Claim 39, wherein a plurality of zones of surveillance are monitored and a plurality of images are generated corresponding to each zone of surveillance, wherein said images are selected for recording by said recording device.--
